

Safety Data Sheet

according to regulation (EC) No 1907/2006

Product name: Strep-Tactin APC conjugate / Strep-Tactin XT APC conjugate

Version: 3.1

Revision date: 14.07.2023

1 Identification of the substance/mixture and of the company/undertaking

1.1 Product identifiers

Product Names: Strep-Tactin® allophycocyanin (APC) conjugate
Strep-Tactin®XT allophycocyanin (APC) conjugate

Product Numbers: 6-5010-xxx
6-5410-xxx

Registration Number:

A registration number is not available for this substance as the substance or its use are exempted from registration according to Article 2 REACH Regulation (EC) No 1907/2006, the annual tonnage does not require a registration or the registration is envisaged for a later registration deadline.

1.2 Relevant identified uses of the substance or mixture

laboratory chemical

and uses advised against:

No relevant information available.

1.3 Details of the supplier of the safety data sheet

Supplier: IBA Lifesciences GmbH
Rudolf-Wissell-Str. 28
37079 Göttingen
Germany

Telephone: +49-551-50672- 0

E-mail: info@iba-lifesciences.com

1.4 Emergency Telephone Number

Emergency Phone: +49 (0)551/ 19240 (Poison Information Center Göttingen)

2 Hazards Identification

2.1 Classification of the substance or mixture

Classification according to Regulation (EC) No 1272/2008 [CLP] not hazardous

2.2 Label elements

Labeling according to Regulation (EC) No 1272/2008 [CLP] n/a

2.3 Other hazards

To the best of our knowledge, the chemical, physical, and toxicological properties of streptavidin and its muteins have not yet been thoroughly investigated.

IBA Lifesciences GmbH therefore recommends treating these products with the care that is due to unknown chemicals.

3 Composition/Information on ingredients

3.2 Chemical characterization: Mixtures

Description of product:

Strep-Tactin® and Strep-Tactin®XT are muteins of streptavidin, an extracellular protein of *Streptomyces avidinii* that binds biotin with high affinity.
The product consists of allophycocyanin (APC) bound to Strep-Tactin® resp. Strep-Tactin®XT.
The product is dissolved in buffer with a concentration of 75 µg/ml.

Hazardous components according to Regulation (EC) No 1272/2008 [CLP]:

No component of this mixture is classified as hazardous according to Regulation (EC) No 1272/2008.

4 First aid measures

4.1 Description of first aid measures

- After inhalation:** Provide fresh air. If feeling unwell, consult a physician.
- After skin contact:** Wash with plenty of soap and water. If skin irritation occurs, consult a physician.
- After eye contact:** Flush eyes with water for at least 10 minutes. If irritation persists, consult a physician.
- After ingestion:** Rinse mouth and drink water if conscious. If feeling unwell, consult a physician.

4.2 Most important symptoms and effects, both acute and delayed

No relevant information available.

4.3 Indications of any immediate medical attention and special treatment needed

No relevant information available.

5 Firefighting measures

5.1 Extinguishing media

Suitable extinguishing media

CO₂, dry extinguishing powder, foam, or water spray.

Unsuitable extinguishing media

No relevant information available.

5.2 Special hazards arising from the substance of mixture

No relevant information available.

5.3 Advice for firefighters

Wear self contained breathing apparatus for fire fighting if necessary .

6 Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Avoid eye and skin contact.

6.2 Environmental precautions

Do not let product enter drains.

6.3 Methods and material for containment and cleaning up

Dilute spill with water and absorb it.

Place in appropriate containers for disposal.

6.4 Reference to other sections

Information about safe handling: see section 7.

Information about protective equipment: see section 8.

Information for disposal: see section 13.

7 Handling and storage

7.1 Precautions for safe handling

Provide appropriate exhaust ventilation at places where dust is formed.

Keep containers, equipment, and workplace clean.

7.2 Conditions for safe storage, including any incompatibilities

Storage rooms and containers: No special requirements.

Incompatible substances or mixtures: Keep away from food and drink.

Consideration of other advice: Keep containers tightly closed.

Recommended storage temperature: 2 – 8 °C

7.3 Specific end use(s)

No relevant information available.

8 Exposure controls/personal protection

8.1 Control parameters

Components with workplace control parameters: none

8.2 Exposure controls

General precautionary and hygiene measures

The usual precautions for handling chemicals should be observed.

Avoid contact with eyes and skin.

Wash hands before breaks and after work.

Respiratory protection

Respiratory protection is not required. Where protection from nuisance levels of dusts are desired, use type N95 (US) or type P1 (EN 143) dust masks. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

Hand protection

Wear suitable gloves. Chemical protection gloves are suitable, which are tested according to EN 374.

For special purposes, it is recommended to check the resistance to chemicals of the protective gloves mentioned above together with the supplier of these gloves.

Inspect gloves prior to each use. Choose suitable gloves according to break through time, permeation rate and material degradation.

Glove material

Nitrile rubber, minimum layer thickness: $\geq 0,11$ mm

The suitability of gloves depends on several quality characteristics besides the material. It may differ from one supplier to another.

Break through time

Break through level: Level ≥ 6

The exact break through time should be inquired from the supplier and should be observed.

Eye protection

Use safety goggles with side protection.

Body protection

Choose body protection in relation to its type, to the concentration and amount of dangerous substances, and to the specific workplace. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

9 Physical and chemical properties

9.1 Information on basic physical and chemical properties

Appearance:	blue liquid
Odor:	odorless
Odor threshold:	no data available
pH:	6.7 – 6.9
Melting point:	no data available
Freezing point:	no data available
Initial boiling point and boiling range:	no data available
Flash point:	no data available
Evaporation rate:	no data available
Upper/lower explosive limits:	no data available
Vapor pressure:	no data available
Vapor density:	no data available
Relative density:	no data available
Water solubility:	fully miscible
Partition coefficient (n-octanol/water):	no data available
Viscosity:	no data available
Explosive properties:	not explosive
Oxidizing properties:	not oxidizing

9.2 Other safety information

No further relevant information available.

10 Stability and reactivity

10.1 Reactivity

See section 10.3

10.2 Chemical stability

Stable under recommended storage conditions.

10.3 Possibility of hazardous reactions

No relevant information available.

10.4 Conditions to avoid

No relevant information available.

10.5 Incompatible materials

No relevant information available.

10.6 Hazardous decomposition products

No relevant information available.

11 Toxicological information

11.1 Information on toxicological effects

Acute toxicity

No component is classified as acute toxic.

Skin corrosion/irritation

No component is classified as classified as irritant.

Serious eye damage/eye irritation

No component is classified as classified as irritant.

Respiratory or skin sensitization.

No component is classified as classified as a respiratory or skin sensitizer.

Germ cell mutagenicity

No component is classified as a mutagenic toxicant.

Carcinogenicity

No component is classified as a carcinogenic toxicant.

Reproductive toxicity

No component is classified as a reproductive toxicant.

Specific target organ toxicity – single exposure

No component is classified as a specific target organ toxicant (single exposure).

Specific target organ toxicity – repeated exposure

No component is classified as a specific target organ toxicant (repeated exposure).

Aspiration hazard

No component is classified as an aspiration hazard.

12 Ecological information

12.1 Toxicity

No relevant information available.

12.2 Persistence and degradability

No relevant information available.

12.3 Bioaccumulative potential

No relevant information available.

12.4 Mobility in soil

No relevant information available.

12.5 Results of PBT- and vPvB-assessment

No relevant information available.

12.6 Other adverse effects

No relevant information available.

13 Disposal considerations

13.1 Waste treatment methods

Recommendation for product:

The disposal is regionally differently regulated, therefore the kind of disposal is to be inquired at the responsible authorities.

Contaminated packaging:

Dispose of as unused product.

14 Transport information

14.1 UN-Number

ADR/RID: - IMDG: - IATA: -

14.2 UN proper shipping name

ADR/RID: not dangerous goods **IMDG:** not dangerous goods- **IATA:** not dangerous goods

14.3 Transport hazard class(es)

ADR/RID: - IMDG: - IATA: -

14.4 Packaging group

ADR/RID: - IMDG: - IATA: -

14.5 Environmental hazards

ADR/RID: no **IMDG:** marine pollutant: no **IATA:** no

14.6 Special precaution for user

No relevant information available.

14.7 Transport in bulk according to Annex II of MARPOL and the IBC code

No relevant information available.

15 Regulatory Information

15.1 Safety, health and environmental regulation specific for the substance or mixture

National regulations:

No relevant information available.

15.2 Chemical Safety Assessment

No Chemical Safety Assessment has been carried out for this substance / mixture.

16 Other information

The above information is based on our present-day knowledge. It does not represent any guarantee of the properties of the product, not guarantee specific properties of the product and shall not establish a legally valid contractual relationship.

17 Changes to Version 3.0 (from 01.11.2015)

Strep-Tactin®XT APC conjugate has been added to the product portfolio. The information relevant for the MSDS is the same as for Strep-Tactin® APC conjugate.
