

Data Sheet

Strep-Tactin® Superflow®

high capacity

50% suspension

Cat. No.: 2-1208-002, 2-1208-010,
2-1208-025, 2-1208-500

Lot No.: 1208-

Version: 9.3
Revision Date: 25.02.2020

Description	High capacity Strep-Tactin® resin for the purification of Strep-tag®II and Twin-Strep-tag® fusion proteins. Strep-Tactin® is a streptavidin variant with optimized binding properties for Strep-tag® fusion proteins*.
Support	Superflow 6 (6 % agarose, crosslinked)
Form	50 % suspension in buffer, pH 8.0 : 100 mM Tris-HCl pH 8.0, 1 mM EDTA, 150 mM NaCl, 0.02 % sodium azide.
Biotin binding activity	> 900 nmol/ml resin
Stability	6 months after shipping
Storage	recommended: 2- 8 °C
Shipping	room temperature
Hazards	Product is not classified as hazardous according to (EC) No 1272/2008 [CLP]. A Material Safety Data Sheet is provided.

Application	Important note: To allow an efficient Strep-tag®/Strep-Tactin® binding we strongly recommend using column purification instead of batch applications for proteins fused to Strep-tag®II. It is crucial that protein binding takes place on the column. Even a pre-incubation of resin and lysate prior to filling the resin into a column will lead to decreased protein yields. Batch purification should be performed using Twin-Strep-tag® in combination with MagStrep “type3” XT beads only. Further, prolonged batch incubations increase the risk of proteolytic degradation of the target protein including cleavage of the tag.
Elution	Strep-Tactin® Elution Buffer with Desthiobiotin (Buffer E), pH 8.0: 100 mM Tris-HCl, 150 mM NaCl, 1 mM EDTA, 2.5 mM desthiobiotin It may be advantageous to use 5-10 mM desthiobiotin to get the target protein eluted at higher concentration.
Regeneration	Strep-Tactin® Regeneration Buffer with HABA; Buffer R If HABA cannot be efficiently removed from Strep-Tactin Superflow high capacity by using Buffer W, we recommend using Buffer W at pH 10.5 (or alternatively 100 mM Tris base) for efficient removal of HABA.

For research use only

Important licensing information

This product is based on Strep-Tactin technology covered by intellectual property (IP) rights and on completion of the sale IBA grants respective Limited Use Label Licenses to purchaser. IP rights and Limited Use Label Licenses for said technology are further described and identified at <http://www.iba-lifesciences.com/patents.html> or upon inquiry at info@iba-lifesciences.com or at IBA GmbH, Rudolf-Wissell-Str. 28, 37079 Goettingen, Germany. By use of this product the purchaser accepts the terms and conditions of all applicable Limited Use Label Licenses.

Trademark information
